

Position Title: SAGD Measurement While Drilling Consultant

Position Location: Alberta, Canada (field work)

Reports to: SAGD Operations Manager

Position Overview

The SAGD MWD Consultant will be responsible for assembling, testing, and operating measurement while drilling, formation evaluation, and ranging tools in a SAGD environment. This individual will be working alongside Pacesetter's SAGD operations team; they will be accountable to provide effective communication by providing the status of equipment, personnel, and current operations.

Responsibilities

- Control the quality of service delivery and execution during all phases of operations
- Work alongside the SAGD operations team; provide the status of equipment, personnel, and current operations
- In addition to MWD technology duties, the individual will provide support with operational integration of company processes
- Maintain knowledge of the latest technological changes and operating procedures pertaining to company equipment, tools, and practices, to ensure maximum operating efficiency
- Support Pacesetter's values in regards to quality of services, technology, and HSE
- Portray a positive image and confidence in the quality of services
- Project reporting and field process development
- Plan, prepare, and coordinate well site operations
- Perform assigned reporting and administrative duties for field operations, accurately and on schedule

Education, Experience, Technical Qualifications

- 5+ years MWD field experience, with a minimum of 3 years in the SAGD market
- Must be eligible to work in Canada
- Strong understanding of formation evaluation; extensive knowledge of MWD technology
- Preference will be given to candidates with experience in: Active ranging, wireline operations, LWD/formation evaluation operations, anti-collision, MSA, and advanced survey techniques
- Strong analytical and problem solving skills
- Must be proficient in EM technology and an experienced operator
- Conceptual understanding of reservoir and well placement real-time
- Assures adherence to all industry safety regulations
