

**Position Title:** RSS ROC Operator (Consultant)

**Position Location:** Calgary, Alberta

**Reports to:** Operations Manager

### **Position Overview**

As a Rotary Steerable ROC (Remote Operations Center) Operator, you will be providing operational and technical support to all RSS related jobs, while ensuring all standard operations procedures are being followed. This position requires deep technical knowledge and an in depth understanding of Pacesetter's 475 and 675 rotary steerable systems ( <https://www.pacesetterdirectional.com/services/pacesetter-rotary-steerable/> ). As an RSS ROC Operator, you will be responsible for building and enhancing Pacesetter's performance in the Rotary Steerable market.

### **Responsibilities**

- Remotely monitor all RSS field operations over a 12-hour shift.
- Ensure that standards of operation, equipment, and operator performance are maintained to provide consistent premium-quality service and results for Pacesetter's clients.
- Track BURR, RSS health, and MWD shock values for all RSS downhole operations.
- Provide detailed operational updates for each rig at the end of your shift.
- Build field representatives knowledge of the PowerDrive Orbit Rotary Steerable System and provide ongoing training to directional drillers new to RSS operations.
- Work with field representatives to ensure proper execution of the plan and troubleshoot well profile related issues.
- Assist with post run follow up reports and other client related requests.
- Ensure safe operations on all RSS jobs and related RSS work throughout the company.

### **Education, Experience, Technical Qualifications**

- **Must be incorporated with AB WCB coverage**
- Deep technical knowledge of directional drilling, and Pacesetter's PowerDrive Orbit.
- Experience with remote drilling operations.
- Strong RSS operations experience with a solid understanding of job execution.
- 7+ years of experience in the directional drilling space.
- A strong background in the day-to-day operations of directional drilling coordination.
- A strong background in day-to-day rig and drilling operations.
- Ability to develop and maintain strong field representative and client relationships.
- Strong RSS operations experience with a solid understanding of job execution.

### **Additional Skills**

- Ability to manage multiple priorities and multiple stakeholders.
- Superior detail orientation; values accuracy and has high standards around quality of work.
- Process thinker, with high degree of initiative and ability to work independently
- Ability to work in a fast-paced environment.
- Strong team player with a positive attitude; willingness to do what is needed.
- Exceptional time management and organizational skills.
- Excellent communication skills; constant communication to the field RSS operations.
