

Position Title: Directional Well Planner

Position Location: Calgary, Alberta (Downtown)

Reports to: Well Planning Manager

Position Overview

The Directional Well Planner is responsible for creating plans based on client requirements and making recommendations based on area experience. The Well Planner is responsible for communicating effectively with team members and the operations group to ensure efficiency and risk management during the execution of the plans. This role varies in time demands depending on the drilling season.

Responsibilities

- Plan vs actual updates; morning and as needed throughout the day and on call rotation starting at 5 am
- Creating / revising well plans
- Building preliminary well plans
- Analyzing anti-collision reports and making recommendations
- Attending meetings with clients
- Assisting with any other well planning requests

Preferred Education, Experience, Technical Qualifications

- 5 + years' experience as a directional well planner
- A good understanding of industry standards and government regulations
- Ability to quickly acquire knowledge and skill with differing types of software
- Experience using Landmark Compass planning software
- Experience using GeoScout / AccuMap and GeoWiz
- Petroleum Technology Diploma or field experience would be an asset

Candidate Profile

- Must be eligible to work in Canada
- Superior detail orientation; values accuracy and has high standards around quality of work
- Willingness to learn new techniques, open to new ideas
- Strong math and analytical skills
- Ability to manage multiple priorities and multiple stakeholders
- Process thinker, with high degree of initiative and ability to work independently
- Positive approach, with willingness to do what is needed
- Ability to work in a fast-paced environment, with varying schedules and deadlines
- Strong emphasis placed on being a team player with a positive attitude
- Exceptional organizational skills
