

**Position Title:** Application Developer  
**Position Location:** Calgary, Alberta  
**Reports to:** Product Development Manager

## Position Overview

Pacesetter is a leading directional drilling service provider and is looking for a .NET developer to assist in the development and implementation of our field operations platform. This is an exciting opportunity for a strong programmer who is not afraid to learn about the directional drilling space in oil and gas and who likes turning business opportunity into scalable and powerful applications. As an application developer, you will participate in all aspects of development from requirements gathering, analysis, design, development, implementation, deployment, and maintenance. In other words, you will be very active in the entire development lifecycle. If you are looking to join a close-knit and driven company in the oil and gas space, please submit your resume to [blouie@pacesetterdirectional.ca](mailto:blouie@pacesetterdirectional.ca). You must be eligible to work in Canada. Preference will be given to individuals who are local to Calgary as relocation will not be part of an offer package.

## Responsibilities

- Designing, developing, implementing, maintaining, and supporting Pacesetter application development.
- Debugging and testing software implementations.
- Providing technical support to users and other team members.
- Providing recommendations for improvements to our development process.
- Monitoring the latest trends and technologies in software development and helping us employ best practices and efficient processes.

## Education, Experience, Technical Qualifications

- Post-secondary degree/diploma in Computer Science or equivalent.
- 5+ years experience in application development in small teams using agile and/or scrum methodologies.
- Proficiency in .NET
- Demonstrated experience programming high availability applications.
- SQL Server experience T-SQL and stored procedures will be considered as an asset.

## Required Languages

- C#
- T-SQL
- JavaScript (React)

## Additional Skills

- Ability to manage multiple priorities and multiple stakeholders.
- Superior detail orientation; values accuracy and has high standards around quality of work.
- Process thinker, with high degree of initiative and ability to work independently.
- Ability to work in a fast-paced environment.
- Strong team player with a positive attitude; willingness to do what is needed.
- Labview familiarity will be considered an asset.
- Git experience will be considered an asset.
- Experience or knowledge of oil and gas, specifically directional drilling will be considered an asset.

**You must be eligible to work in Canada. Preference will be given to individuals who are local to Calgary as relocation will not be part of an offer package.**
