

Artis Drills Record Duvernay Well

DUVERNAY

OPERATOR	Artis Exploration Ltd.
HOLE SIZE	311mm / 222mm / 216mm
TOTAL DEPTH	5,940m MD

HIGHLIGHTS

- 3,497m drilled in a single run
- Average Lateral ROP of 91.4m/hr

TECHNOLOGIES

- Redline Pulse MWD
- Pacesetter Orbit RSS with Acoustic Live Communication
- Atlas Motor

Pacesetter Powerdrive Orbit RSS with Acoustic Live Communication drills 5,940m in 7.25 days

Using Pacesetter's combined technologies of Redline Pulse MWD and PowerDrive Orbit RSS coupled with our Acoustic Live Communication, Artis in partnership with Ramdar drilled their fastest Duvernay well in the Twining field to date. The 3,497m lateral was drilled in a single run, completing the pacesetter well at 5,940m MD.

Congratulations to Artis Exploration Ltd., Ramdar Resource Management Ltd., and the rig crews of Savanna 689 on this outstanding achievement. A special thanks to Pacesetter DD Supervisors Mike Spearns & Todd Johnston, and MWD Supervisor John Fenton.
