

Longest Well in Canada Record 9023m Duvernay Well

DUVERNAY

OPERATOR	Kiwetinohk Energy Corp.
HOLE SIZE	349mm/251mm/222mm/171mm
TOTAL DEPTH	9,023mMD

HIGHLIGHTS

- Zero Pacesetter related NPT
- MWD & RSS tools endured high temps up to 147°C
- 257 total hours
- 1700 to 1850kg mud weight
- 40 downlinks required
- EM detection at TD

TECHNOLOGIES

- XPACE DT MWD
- Pacesetter Orbit RSS
- Acoustic Live Communication
- Reed TK53-O5 Bit
- Phoenix 6/7 8.8 Motor

Kiwetinohk sets new Canadian land record for deepest well using Pacesetter's Orbit RSS

Pacesetter's advanced technology, combining the XPACE Dual Telemetry MWD and our enhanced PowerDrive Orbit RSS with Acoustic Live Communication, enabled Kiwetinohk to drill a record-breaking 9,023m MD well in the Saxon field. Pacesetter's XPACE DT MWD and Orbit RSS tools endured a max temperature of 147°C, and there was zero Pacesetter related non-productive time throughout the entire well operation.

Congratulations to Kiwetinohk Energy Corp., the rig crews of DC 2, Pacesetter's DD and MWD Supervisors, and Pacesetter's Real-Time Remote Monitoring Operations for effectively executing this impressive well.

Pacesetter's Deepest Wells to Date
